**DETAILED ACTION**

1. A preliminary amendment was filed in Paper No. 5, dated Dec. 6, 2001. Claims 1-13 are in the case.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-6, drawn to D is carbon compounds, classified in class various, subclass various, depending on species election. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1-3, 7-13 reading on the elected compounds can be prosecuted together with the election to the extend of the election.
- II. Claims 2-3 in part (not encompassed by group I), drawn to D is nitrogen compounds, classified in class 546, subclass various, depending on species election. If this group is elected, a further election of a single disclosed species is also required. Generic claims 1, 7-13 reading on the elected compounds can be prosecuted together with the election to the extend of the election.
- III. Claim 1 remaining, drawn to D is O, S or subject matter not encompassed by groups I or II, classified in class various, subclass various, depending on species election. If this group is elected, a further election of a single disclosed species is also required. Generic claims 7-13 reading on the elected compounds can be prosecuted together with the election to the extend of the election.

The inventions are distinct, each from the other because:

Art Unit: 1625

Compounds of groups I-III are independent and distinct because the recited compounds possess variable core. The members of the recited Markush groups are so disparate chemically as to represent a plurality of classes for which the search and merit examination are not co-extensive. A reference anticipating any of groups I-III would not necessarily imply unpatentability of the other groups.

A telephone call was made to Mr. T. Rands on Jan. 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Should applicant traverse on the ground that the groups and species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the groups or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. In the instant case, then there could have been no patentability over WO 98/55260 which anticipated or rendered claim 1 obvious (see CA 129:10933 and RN attached).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1625

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
